Of the Foure Quarters of this yeare.

And first of Winter. ☽ in ♂. ♐. ♑.

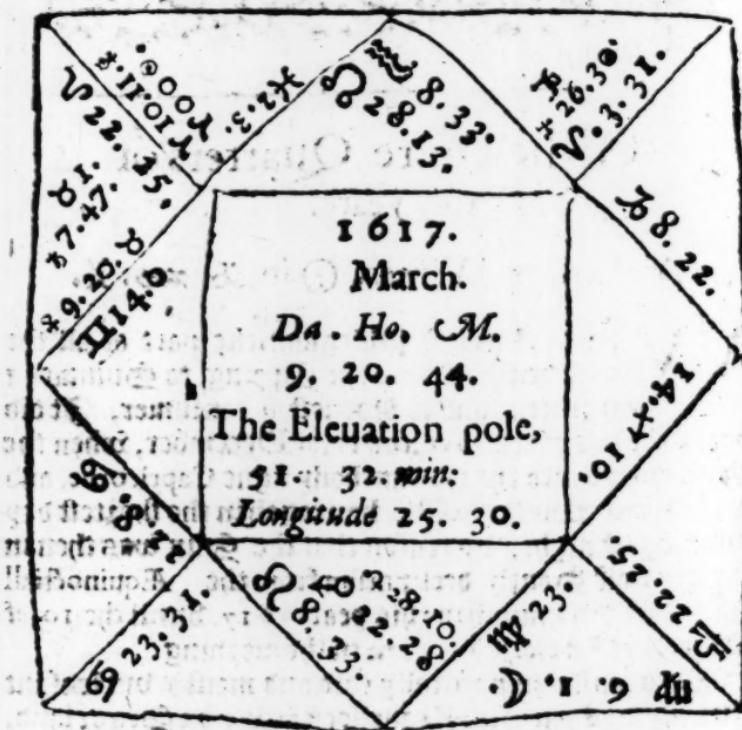

VV Inter the most Phlegmaticke part of all the
yeare being a foe to the Spiring, to Summer a
disgrace, and to Harvest a consumer. It did
begin the last yeare 1616 the 11. of December, when the
Sun entred into the Melancholly signe Capricorne, and
it made our Winter Solstic. having then the shortest day
and longest night, by reason that the Sun was then in
the greatest South declination from the Equinoctiall
Lynie, but continueth in this yeare 1617. vntill the 10. of
March, at 8 a clock, 14. min: in the morning.

This season is naturally cold and moist & unpleasante
(for the most part) to Travellers either by Land,
and to aged persons very cumbersome, causing superflu-
ties of rawnesse, and abundance of cold and moistnesse to
oversooe their bodies.

The sicknesse of the Winter are Agues, Rhumes,
Cathars, Coughes, paines in the breast and sides, and
lyness, Gouts, Impenitence of the belly, and the like diseases
which proced of cold humors, &c.

A Prognostication.

A Constellation of the Heauen at the Sunne,
entrance into Aries, the Vernal Equinoctiall

Of the Spring. O in V 8 II.

The Sunne having fully finished the Winter Quarter
with the last part of H, at his entrance into the first
part of the Aequinoctiall ligne Aries, making the artificiall
day equall with the night, he reneweth the most delectable
revolution called the Spring which beginneth this year
the r. of March, 8 hours 44. minute.

This Quarter of the yeare is naturally hot & moist, and
that temperately without extremity, & is therefore accom-
panied the most wholesome time in the yeare, & the fittest time to
gaine ease to diseased bo dies, and to restore health againe to
so those in whom it hath been decayed. The

Browne, 1617.

The diseases which are likely to bee this Quarter, are Coughes, stoppyng of the gall, paines in the backe, diseases of the stomacke, & liuer through cold & moist humors, &c.

Of Summer. ☽. in ♡. ♢. 17.

Summer beginning at the Sunnes entring into the I. min: of Cancer, at which time he is nearest to our Teritical point making his greatest declination towards the North, from the Aequinoctiall, and causing the summer solstice, and then is our longest day and shortest night which shalbe this yeare the II. day of June at 1. of the clock, 42. minuts, and so continueth vntill the 13. of September, one a clock, 43. min.

This sealon according to his proper nature, is hot & dry, resembled to Choller, Sickneses of the Summer are hot burning Fener's continuall Fener's, Tertiaries, fluxes, Comics, paines of the eares, blisters and sores of the mouth, with immoderate sweating.

Of Haruest. ☽. in ♡. M. 17.

The Haruest Quarter or fall of the leafes, beginneth emore at the time of the Sunnes entring into the first min: of the second Aequinoctiall signe ♡ taketh place this yeare the 13. day of September at 1. of the clock and 43. minuts in the morning, when the day & night accord lecondly in equall length, but endureth vntill the 11. of December, The disposition of this sealon is euermore unconstant & variable by which meane it is the nurse & foster of most sickneses happening in the sp[ring] & summer. Concerning the diseases which are like to happen, they are Quartan Feners, & Dypilations of the spleen, Dwyplies, Stranguries, Aches in the Huckle bones, fricttions of the howles, and many other Diseases which proceed of Melancholly, for the preventing & the helping of all which take counsill of the learned Phisition. And remember that saying of the wiseman, Eccle 38. 1. Honour the Phisition with that honour that is due to him, because of necessity: for the Lord hath created him for thy good.

Eccle. 38. 9. Faile not in thy sicknes, but pray unto the Lord, and he will make thee whole. Isai 38. 2.

For the likely disposition of the weather which is a
thing that most men do looke for in every Almanacke,
I haue shewed the Aspects which the Planets haue
with the Moon at every Quarter and change; If it
please God to suffer the Heauenly Bodies to worke
the effectes according to nature, for if any thing fal not
out as they would haue it, nor as it should by nature,
they must note what God speaketh to Job,

Canst thou restraine the sweet influences of the Pleiades? or loose the bands of Orion. Job. 38. 31. 32.

Canst thou bring forth Mazzaroth in their times? canst thou also guide Arcturus with his sonnes, it is ans: What man is boyn, that can doe that whiche thou requirest me concerning these things O God, Esd. 4. 6. And also I haue withholden the raine from you, when there were yet thre Moneths to the harvest, and I caused it to raine vpon one City, and haue not caused it to raine vpon another. Amos. 4. 7.

And he changeth the times & seasons, Dan. 2. 21.

And according to his will hee worketh in the armie of Heauen. Dan. 4. 32.
